

DESCRIPTION

Forged Carbon Steel Strainers are applicable to all types of steam, water, oil and air systems.

Used to protect steam traps, regulating valves and control valves, etc. from dirt which is often the main cause of damage, which ultimately leads to energy loss of fluid systems.

Connections are female screwed BSPP with options for NPT Thread and Socket Weld

Our complete range of class 800 forged valves offer cost effective confidence, with long life.

Forged Carbon Steel Class 800 Y Type Strainer.

- Carbon Steel 1/2" - 2"
- 38 Bar Rated
- Screen Size 20 Mesh
- For use on Steam, Water, Oil and Air.
- Up to 425°C

Description

Pipeline Y strainers in carbon steel. Screwed BSPP, NPT and Socket Weld. Supplied with 316 St St screen in 20 Mesh. Temperature up to -29°C to 425°C (see chart). Pressure rating up to 38 Bar. Fitted with drain plug in cap and can be fitted in both horizontal and vertical downstream positions.

Beschreibung

Pipeline Y Siebe Kohlenstoffstahl. Screwed BSPP, NPT und Socket Weld. Geliefert mit 316 St St -Bildschirm in 20 Mesh. Temperature bis zu 425°C -29°C (siehe Grafik). Nenndruck bis zu 38 Bar. Ausgestattet mit Ablassschraube in Kappe und können in horizontaler und vertikaler nachgeschalteten Positionen montiert werden.

Descripción

Pipeline Y coladores en acero al carbono. Screwed BSPP, NPT y Socket Weld. Se suministra con 316 pantalla St St en 20 Mesh. Temperature hasta -29°C a 425°C (véase el gráfico). Resistencia a la presión hasta 38 bar. Equipado con tapón de drenaje en la tapa y se puede montar en las dos posiciones posteriores horizontales y verticales.

Description

Pipeline Y crépines en acier au carbone. Screwed BSPP, TNP et Socket Weld. Livré avec écran 316 St St à 20 Mesh. Temperature jusqu'à -29°C à 425 °C (voir graphique). Note de pression jusqu'à 38 bars. Equipé de bouchon de vidange dans le bouchon et peut être équipé dans les deux positions en aval horizontales et verticales
